

1. Integer to Float

```
#include <stdio.h>
int main(){
    int a=10;
    int b=20;
    int c=a+b;
    float d=(float)c;
    printf("c = %d\n",c);
    printf("after casting:\n");
    printf("c = %.2f\n",d);
    return 0;
}
```

Output:

A screenshot of a terminal window with a dark background. The terminal has a title bar that says "Output". Inside the terminal, the output of the C program is displayed in a monospaced font. It shows three lines: "c = 30", "after casting:", and "c = 30.00".

```
Output
c = 30
after casting:
c = 30.00
```
